1. August output in the Geographic Research Area reflected the normal late-summer upswing. A number of self-initiated projects were completed and disseminated during the month. Special support was provided to OCI and other components on Soviet geography and military programs. Major attention continued to be given to the guidance of mapping intelligence procurement and to the support of operational planning.

2. The Cartography Division completed 138 maps and charts -- 127 for the Agency and 11 for the Department of State. Requests were accepted for 116 maps and charts -- 112 for the Agency and 4 for the Department of State.

3. The Geography Division completed one Geographic Intelligence Review (MR-55); one Geographic Intelligence Report (G-22, Noril'sk); one Geographic Intelligence Memorandum (GM-9, Resistance in Tibet); one NIS Chapter IX on Cyprus; one contribution to the NIS Chapter I Annual on Denmark; and four geographic memoranda in the G/E and G/I series, one of which (G/I-259), was a self-initiated contribution to NIE 11-4-58, Main Trends in Soviet Capabilities and Policies, 1958-1963.

4. The Map Library Division received 4,602 foreign-published maps during August. Of these, 33% were retained in CIA, 33% sent to AMS, and 26% to the Library of Congress. A total of 21,388 map sheets were sent out in response to 1,333 requests; in addition, 264 items were distributed in response to 97 requests for related geographic and cartographic materials. Requirements for maps of the Middle East continued high during the month and requests for materials on the Formosa Strait area were heavy.

5. The GRA City Plan project progressed well during the month. D/GC's pilot map of the first city, Alma Ata, is presently in reproduction; a plan of Stalinabad will be ready for reproduction in September. Compilation of additional data for these and subsequent cities continues to be carried forward by the Geography Division. Acting Chief/G briefed visiting Air Force personnel regarding the project in the latter part of the month.

S-E-C-R-E-T

25X1A9a

6. [REDACTED] of the Geography Division delivered a 40-minute briefing for the DCI on the subject of expanded Soviet plans in Antarctica.

7. At the request of the Control Staff, ORR, conferences were held with S/COM and S/TR on the initiation of a joint project related to missile-associated activities in the Arctic.

8. At the request of the Intelligence Information Staff, ORR, members of the USSR Branch have been giving short substantive geographic briefings on the USSR or particular parts of it to prospective travelers who have been contacted by OO and served requirements by the Agency. This procedure has had good results, especially in the case of specialists who had little or no knowledge of the Soviet Union. During the month, the following were briefed: Members of the Agricultural Mechanization Delegation, the Chairman and Deputy Chairman of the Cotton Delegation, and [REDACTED] 25X1A5a1□

9. At a meeting held on 29 August 1958, the NIS Chapter IX Subcommittee agreed to submit proposals to the NIS Committee that either the number of Chapters IX be reduced from 8 to 7 per year, or that the Section 19 portion be deleted from future Chapter I Annuals. A copy has been sent to the AD/BI.

25X1A5a1□

10. A meeting was held in the Map Library Division to determine the Air Force's requirements for [REDACTED] aerial photography of the Blue Nile area in Ethiopia. Possible future collection action will depend on whether or not the Army Map Service decides to underwrite the collection costs for the photography. Other coordination actions related to aerial mapping of the West Bank of the Jordan River; aerial photo coverage of oil concessions in Libya; and conferences with O/L, AMS, and a private firm on a proposed special project.

11. A visit by a representative of the U.S. Army Special Forces School has resulted in a formal request for D/GG to prepare a trial U/W study that incorporates features not included in material presently available to the school.

12. Twenty-eight GRA personnel attended the annual meeting of the Association of American Geographers, which has held in Santa Monica, California, from 18 to 22 August. In addition to attending the regional and general sessions, the group participated in two all-day field trips. Those personnel who traveled by government-provided aircraft considered the flight to and from Los Angeles among the most valuable features of the trip.

## MONTHLY REPORT FOR THE CARTOGRAPHY DIVISION

Month of August 1958

### A. Summary of Cartographic Production and Accomplishments

1. During August the Cartography Division accepted requests for 116 maps and charts, 112 for CIA and 4 for the Department of State. Of the Agency requests 53 were by OMI, 17 by OSI, 7 as CIA contributions to NIS, 4 by ONE, 19 by OOI, 5 by DD/P, 6 by DD/S, and 1 for the DCI.

2. During the month the Division completed 138 maps and charts, 127 for the Agency and 11 for the Department of State.

3. The NIS Coordinator received 48 job requests during the month, 33 maps for final reproduction and 15 for color proofing. A total of 23 maps were sent to reproduction, 7 final maps and 16 color proofs. A total of 35 maps were returned from reproduction, 17 final maps and 18 color proofs. Twenty-eight map requests remain in the Map Coordinator's office at the end of the month. In addition to the above, 22 reruns were processed for D/GI use, leaving a backlog of 54 maps remaining for rerun.

4. The total number of maps and charts in the Division at the end of August was 420, distributed among the branches as follows:

USSR and Satellites	84
Far East and Western Hemisphere	91
Europe-Africa	42
Special Support	30
Development & Construction (Exclusive of Drafting Sec.)	<u>173</u>
Total	420

Production in the Division increased slightly over the previous month despite the loss of man-hours due to vacations and attendance at professional meetings.

### B. Administrative Problems and Other Activities

1. The City Plan project progressed excellently during the month. The pilot map of the first city is in reproduction and the second city plan will be ready for reproduction in September.

2. The Division is currently reviewing its overtime situation with the aim of reducing the amount of overtime needed to the absolute minimum.

~~SECRET~~

Monthly Report - Cartography Division

August 1958

25X1X77:30 18:4

25X1X7 3. In cooperation with [REDACTED] the Division completed 25 maps for their contribution to NIS. Approximately 1,100 man-hours (300 were overtime) were employed in fulfilling the requirement. One hundred and fifty folded and 10 flat copies were supplied [REDACTED] of each map with an additional 50 copies for D/GL. Requests from [REDACTED] for additional support on a regional basis will be forthcoming as per communication of 118 August.

4. Ten people from the Division attended, under duty status, the annual meetings of the Association of American Geographers held in Santa Monica, California, 18-22 August. Reports indicate the meetings were excellent and well attended.

25X1A9a

25X1A9a 5. [REDACTED] reported for duty as NIS Map Coordinator and [REDACTED], former Coordinator, was transferred to the USSR-Satellite Branch as Acting Deputy Chief. In addition to his duties as NIS Coordinator, 25X1A9a [REDACTED] has been assigned the responsibility for processing all rerun requests received from D/GL.

25X1A9a

6. In the absence of the Chief, [REDACTED] served as Acting Chief of the Geographic Research Area, as well as Chief of the Cartography Division, during August.

PROGRESS REPORT FOR THE GEOGRAPHY DIVISION  
August 1958

## I. ACCOMPLISHMENTS

A. Completed Work

Geography Division production for August included 1 MR, 1 geographic intelligence report in the CIA/RR-G series, 1 report in the CIA/RR-GM series, 1 NIS Chapter IX, 1 contribution to the NIS Chapter I Annual, and 4 geographic memorandums in the C/I and G/E series, as follows:

		<u>Requester</u>
CIA/RR-MR-55	Geographic Intelligence Review	Self-initiated
CIA/RR-G-22	Noril'sk	Self-initiated
CIA/RR-GM-9	Resistance in Tibet	Self-initiated
NIS 25 C Cyprus	Chapter IX (Sections 90, 91, and 92)	NIS Program
NIS 7 Denmark	Section 19, Chapter I, Annual	NIS Program
G/E-86	Internal Administrative Divisions of British Guiana	Department of State/Geographer
G/I-258	Surveillance Points for Observation of Guided-Missile Activity at Selected Soviet Shipyards and Naval Bases	OSI/GMD
G/I-259	Contribution to NIE 11-4-58: Main Trends in Soviet Capabilities and Policies 1958-1963	Self-initiated for NIE
G/I-260	Soviets Attempting to Broaden Bloc Influence in Antarctica	OCI

B. Progress of Work in the Branches and Staffs:

Far East/Pacific Branch: Although leave took its toll, progress on scheduled production was generally satisfactory. Resistance in Tibet, CIA/RR-GM-9, was issued. The study on regional analysis of Northeast Thailand (61.1380) and an article for MR-56, Prospects for Water Power Development in Communist China, were completed in the Branch and are now in Editing. As a by-product of a project on guided missile ranges in Communist China, (61.1653), a memorandum on the probable location of a

launching of a Chinese earth satellite vehicle, possibly on October 1, was prepared for the DD/I. Completed NIS work included contributions to Section 19 for South Korea and the Chapter I Annual for Communist China. Nearing completion as the month ended were the study on possible Guided Missile Ranges in Communist China and a UW feasibility study. Work on other projects is progressing satisfactorily. A possible geographic intelligence memorandum on Offshore Islands (China) is being drafted. The flow of incoming documents remains exceptionally heavy. Two members of the Branch attended the AAG meetings in California.

25X1A9a Near East/Africa Branch: Work on scheduled projects progressed at a slow pace during the month because of sick leave, military leave, annual leave, and area orientation. The major accomplishment was completion of a substantial portion of a UW feasibility study. The numerous contacts outside the Geographic Area included a working level association with the Special Forces School at Fort Bragg that should prove beneficial to the Branch in the future. [REDACTED] recently returned from the U.S. Navy Amphibious Training Center at Little Creek, Virginia, characterizes the Beach Intelligence course as a good example of applied geography. 25X1A9a Reports from [REDACTED] in South Africa indicate that he is making maximum use of his time in the field and that his program is even more profitable than he had anticipated.

25X6A RDP61-00391R00020033 Europe Branch: The report on Railroads of Poland (63.1654) was completed in the Branch and is [REDACTED] for Editing. Progress was made on [REDACTED] Chapter IX, the urban area study for Burgas, Bulgaria, one UW feasibility study, and an article on Hungarian Cartography -- 1958 for the MR. A request was received from Chief, Collection Staff, OSI, for use of the Electronics Division, for compilation of the urban vs. the rural population of, among other areas, Czechoslovakia, Poland, Hungary, Rumania, and Bulgaria. Three members of the Branch attended the AAG meetings.

USSR Branch: Production progress for the month was normally slow due to leave. The urban study on Noril'sk was published and distributed during the month. A memorandum on Surveillance Points for Observation of Guided-Missile Activity at Selected Soviet Shipyards and Naval Bases, for OSI/GND, was completed and forwarded to the requester. Three contributions were made to NIE 11-4-58, only one of which -- Developments in Agriculture (The Corn Program) -- was accepted by ORR. Final refinement of Agroclimatic Aspects of Corn Production (64.1529) continues. Some work was done on UW feasibility studies and on the revision of the report on the Soviet Arctic. An article on the 1:250,000 geological map of the Soviet Arctic, for the MR, was submitted for editing. New projects initiated during the month included that for the compilation of the urban vs. the rural population of the Soviet Union, for OSI Electronics Division, and the support work in the form of substantive data and consultation to the D/GC-PIC team drafting plans of a selected list of cities in the USSR, requested by [REDACTED] Three Branch members attended the AAG meetings.

25X1A8a

Special Research Branch: A miscellany of activities characterized the work of the month, including a rush briefing of the DCI on recently divulged Soviet expanded plans for Antarctica, as well as a briefing of the Working Group on Antarctica on the same subject. Two GS reports were evaluated, one involving Soviet efforts to obtain a gravimeter through Montevideo, and another on mysterious Soviet base line surveys in Hungary, the latter requiring coordination with the GM Staff and GP/FSD/SI. Two geographic memorandums, G/E-86 and G/I-260, were completed, and a third is in draft form. Conferences were held with one of the Branch's Consultants, who also was briefed on Branch interests for an Agency activity sponsored by another office. The manuscript copy of CIA/RR-ER-14 was loaned to USAFCIN 3C2X to forestall duplication of effort. This will make possible USAF concentration on updating the selected bibliography on Soviet geodesy, since ER-14 covers materials up to 1953, as a part of USAF effort to improve its targeting capabilities.

Coordination Staff: The Chapter IX for NIS 25C, Cyprus, and the Section 19 contribution to the Chapter I Annual for NIS 7, Denmark, were completed and forwarded to OBI during August. Work in progress includes: Coordination of Chapter IX for NIS 55, Ethiopia, Eritrea, and the Somalilands, is well under way, and that for NIS 2, Ireland, was begun at the end of the month. The Section 19 for NIS 24, Greece, due the end of August, did not meet its deadline, which means that 2 Sections 19 (Greece and South Korea) and the Section 19 portion of the Chapter I Annual for Communist China are now scheduled for August. One member of the Staff attended the AAG meetings.

25X1A9a

work during the month was devoted to the Antarctic, with the exception of a week's absence to attend the AAG meetings. G/E-86, prepared in July, was issued in August.

Editing and Review Staff: The most distinctive feature of the work of the Staff during August was the editing of four contributions to NIE 11-4-58, Main Trends in Soviet Capabilities and Policies, 1958-1963. The results of this work indicates a need for clarification of the problems involved in the preparation of such contributions. Other work of the month included: Review of proof copies of reports from Reproduction, i.e., MR-55, G-22, and GM-9, issued during the month; editing of G/E-86 (issued during August) and the introduction to ER-14; review of proof copy of GR-183; final preparation of GR-184 for Reproduction; final editorial work on GR-185 and a GM; MR-56 and a G report are in active editing. With four articles now on hand, the Staff hopes to have MR-56 ready for Reproduction by the end of September. One member of the Staff attended the AAG meetings.

## II. RELATIONSHIPS OUTSIDE THE GEOGRAPHIC AREA

At a meeting held on 29 August 1958, the NIS Chapter IX Subcommittee considered an Army proposal that the commitment for Chapter IX production be changed from 8 to 7 Chapters per year to compensate for the time required

for the Chapter I Annual program. The Subcommittee agreed to submit alternate proposals to the NIS Committee for consideration -- that the number of Chapters IX be reduced from 8 to 7 per year or that the Section 19 portion be deleted from future Chapter I Annuals -- and copy of the minutes of the 29 August meeting has been sent with a memorandum of 2 September to AD/EI.

Upon request of St/I, members of the USSR Branch have been giving short substantive Geographic briefings on the USSR and particular regions to prospective travellers to the Soviet Union who have been contacted by OO and served requirements by the Agency. St/I has found that this procedure has greatly facilitated their processing especially in the case of specialists who had little or no knowledge of the Soviet Union. During the month the following were briefed: Members of the Agricultural Mechanization Delegation, the Chairman and Deputy Chairman of the Cotton Delegation, and three University of Minnesota faculty members.

25X1A9a [redacted] of the Economic Area 25X1A9a was briefed by members of the Far East Branch in anticipation of [redacted]

25X1A9a

[redacted] OSI, met with members of the USSR and Europe Branches to outline a request for population information on the Soviet Union and European Satellites for use by the Electronics Division in preparing estimates of the effect of Soviet Bloc jamming activity. Subsequently, a written request was received, and two projects (64.1699 and 63.1701) were initiated.

Lt. Sully H. Fontaine, U.S. Army Special Warfare School, Fort Bragg, conferred with the Near East/Africa Branch on the availability of unconventional warfare materials for use in the Special Forces School. As a result of this visit, we have received a formal request for preparation of a "trial study" that incorporates features not included in material presently available to the School.

25X1A9a

The Division Chief and members of the USSR Branch met with [redacted] St/C, with reference to the initiation of a joint project between S/Com, S/Tr, and GG/S for development of information on missile-associated activities in the Soviet Arctic. The final product would probably take the form of an annotated map and brief narrative.

### III. ADMINISTRATION

25X1A9a

25X1A9a

[redacted] attended the meetings of the Association of American Geographers at Santa Monica, California during the week of 17 August.

25X1A9a

[redacted] typist, entered on duty in the Division during the month.

25X1A9a

[redacted] received one of the first of the NIS commendations awarded.

25X1A5a1

The Far East/Africa Branch member who began the OTR course on Sino-Soviet Bloc: Background of the Moscow-Peking Axis--Regional Survey feels that the initial lectures were inadequate in substance and manner of presentation.

#### IV. PROBLEMS AND RECOMMENDATIONS

The following is quoted from the monthly report of the USSR Branch: The first venture into NIE Contributions has raised a number of questions that would merit some deliberation before the next attempt is made:

1. It was the understanding of GG/S that a contribution was to be uncoordinated, based upon the knowledge and experience of the analyst. The Office of the AD, however, required coordination with the Economic Area.
2. It was the impression that there would be some working level contacts with the NIE staff that would permit amplification of ideas not possible in a "streamlined" edited version.
3. It was not clear how brief the contribution was to be, whether the format was to resemble a finished NIE (at the expense of developing ideas).
4. Must conclusions always be different or are new ideas contributing to an accepted conclusion considered to be contributions? It is recommended that a modus operandi for contributions to the NIE be established in the Area, and, if possible, a briefing be given by a member of the NIE staff outlining the various steps and developments of an NIE contribution.

MONTHLY REPORT FOR THE MAP LIBRARY DIVISION

August 1958

1. Despite vacation schedules, requests for maps and related publications have steadily increased. Requirements continued to be high for the Middle East, and, during the last two weeks of August, demands for materials on Quemoy, Matsu, and surrounding areas were heavy. The Reference Branch serviced 1,333 requests for maps, an increase of approximately 6% over July's high total. 21,368 map sheets were required to fill these requests. 164 related geographic publications were also forwarded to requesters, in response to 97 requests. The Place Name Desk answered 195 requests for place name information, an increase of 37 over July. Requests for miscellaneous geographic information totalled 204.

2. In addition to general map requests, there were 143 for ATMP materials, a 12% increase over last month's total. Of the 143 requests, 122 were for map sheets and 21 were for text items. A total of 2,433 maps and 1102 text items were distributed to satisfy these requests.

3. The Cataloging Section added to the Loan Copy Collection 124 new geographic publications and 1,178 new map titles, comprising 4,020 sheets. In addition to cataloging current receipts, the Cataloging Section has been systematically reducing the estimated 46,500 map sheet backlog which existed in September 1957. 30,500 of these sheets have already been screened and those selected for retention have been incorporated into the file. In August, backlog holdings covering the Western Hemisphere were cataloged. At present, all areas except the Far East have been completed.

4. The Foreign Procurement Branch received 4,602 foreign-published maps during August. The 125X6A countries from which maps were received are [redacted] Norway, [redacted] Italy, and Venezuela.

5. Dr. Chapman conducted procurement in the Punjab during August. Missions are currently being conducted by Dr. Bradley in Taiwan, Mr. Biggs in Brazil, and Mr. Rupp in Yugoslavia. Trips scheduled for September will send Dr. Held to Turkey, Mr. Rogers in Spain, and Mr. Thoreson to Finland.

6. [redacted] former Geographic Research Area representative in [redacted] OO/C, was debriefed [redacted] to his assuming new duties in 9/58. Prior to his departure [redacted]

~~SECRET~~

25X1A9a

[REDACTED] arranged to have all active Geographic Research Area requirements transferred to other Contact Specialists in an attempt to maintain their continuity.

25X1A5a1

7. A meeting was held to determine the Air Force requirements for [REDACTED] aerial photography of the Blue Nile area in Ethiopia. Possible future collection action by D/GI will depend on whether or not the Army Map Service decides to underwrite the collection costs for the photography.

8. Three meetings were held with representatives of O/L, AMS, and a private firm in connection with a proposed contract for a highly classified special project. Other coordination was concerned with the aerial mapping project for the West Bank of the Jordan River, and with collection of aerial photography coverage of oil concessions in Libya.

9. Outgoing communications for August totalled 202. 143 items related to foreign procurement; and 59, to domestic correspondence.
